Subject Index

A

Abrasive particles, increased wear performance of 638–688
Acoustic emissions from 319 aluminum alloy 1–7
Aluminum alloys
  A201-type 801–811
  A206-type 935–941
  A319-type 1–7
  A339-T5-type 813–822
  A356-type 63–70, 227–234, 735–746, 913–922
  aging behavior in cast Al-Si-Mg 905–911
  D357-type, notch yield ratio and fracture toughness of 865–877
  feed metal transfer in Al-Cu-Si 845–853
  modeling of microstructure evolution and microporosity formation in cast 897–904
  modeling silicon carbide reinforced 341–344
  modification in the mold of an Al-5%Si 879–883
  non-equilibrium crystallization in melt-superheated 889–895
  porosity and feeding capabilities of sodium and strontium-modified Al-Si 167–173
  rotary degassing and filter pumps for clean 579–584
  strontium modification in investment casting using 505–509
Aluminum castings
  nondestructive testing of composite 123–125
  produced using evaporative pattern and vacuum techniques 131–140
Austempered ductile irons 609–630
  heavy section, antimony in 753–757
  heavy section, fatigue properties in 759–764
  influences of austempering temperature on 345–352
  micro-inhomogeneity of low-alloy matrix 765–774
  Ni-Cu alloyed, austempering of 609–630
  tensile properties and microstructure of 471–476
Austenite shell formation, effect of graphite on 783–786

B

Belts, grindability of white cast iron with coated abrasive 359–366
Binder systems
  CO_2 silicate, gassing of 57–61
  reblending techniques of cold box 49–56
Boron, effect of additions of, on the structures and properties of white cast iron 775–781
Brass, effect of shot blasting on ductility of leaded red 141–144

C

CAD/CAM developed patterns 885–888
Castings. See also: *Cast iron, Ductile iron, Investment casting, Spheroidal graphite iron, Squeeze casting, Steel casting, Titanium casting, White cast iron*
  cleaning of, with abrasive particles 683–688
  computer scheduling of basic operations for making 645–666
  cope and drag registration system, for near net shape castings 787–793
  defects in steel, diagnosing 477–482
  effects of sand and carbon fiber additions on plaster molds and properties of 301–304
  hot spots in 353–357
  impregnation of 859–864
  squeeze, of metal matrix composites 115–122
  thin-walled, by the CLV process 413–416
Cast iron. See also: *Spheroidal graphite iron*
  crack initiation and propagation in gray and CG 213–225
  grid method of selecting 175–186
  methods for casting SG 273–279
  precipitation of secondary carbides in high-chromium 725–734
  selection of 175–186
  thermal deformation characteristics of 287–293
  unidirectional solidification of 483–488
  white, grindability of, with coated abrasive belts 359–366
CG cast iron. See: *Compacted graphite cast iron*
Chills 547–552
  in gray iron 699–706
  heat pipe 559–563
Chromite defect on steel castings 89–100
CLV process, thin-walled castings by the 413–416
CO_2 silicate sand, pulsed gassing versus continuous gassing of 57–61
Coatings, lost foam refractory 241–244
Cold box binders
  cores, diluted in green sand systems 151–159
  hot distortion of 9–16
  reblending techniques for 49–56
Compacted graphite cast iron, crack initiation and propagation in gray and 213–225
Computers
  computer-assisted production/quality management 689–698
  computer-controlled melting procedure for steel castings 101–104
  computer-controlled system for cupolas 17–24
  modeling of casting solidification, control volume method 527–537
  scheduling of basic operations for making castings 645–666
  used to aid in locating hot spots in castings 353–357
  used to determine parting lines 795–800
  used to estimate cupola and induction melting costs 331–335
Coordinate measuring machine (CMM) in the making of pattern tooling 127–129
Cope and drag registration system, for near net shape castings 787–793
Copper alloys
  BeCu C82500, ductility improvement in 319–325
  castability and gating in permanent mold casting of 41–48
  composition for gravity-pour, low-pressure and high-pressure die cast 327–330
  ductility improvement in 319–325
  nickel-tin spinodal, grain refinement of 25–33
Cores, cold box, dilution in green sand 151–159
Cracks in gray and CG cast irons 213–225
Cupola
  and estimating induction melting costs 331–335
  melting procedure for steel castings 101–104
  micro-computer control system for cupolas 17–24
  plasma arc used in a foundry cupola 677–682

D

Defects, computerized diagnostic system for detecting casting 855–858
Die casting, composition for gravity-poured, low-pressure, and high-pressure 327–330
Distortion, hot, of cold box systems 9–16

Ductile iron. See also: *Austempered ductile iron, Spheroidal graphite iron*
austempering of a Ni-Cu alloyed 609–630
effects of alloy additions on microstructure and mechanical properties of 395–400
effects of shell temperature on investment cast 201–206
fatigue strength of 511–518
filtration of, by refractory cloth 401–411
formation of chunky graphite in heavy section 429–448
heavy-section, role of antimony in 753–757
influences of austempering temperature on 345–352
isothermal transformation diagrams of 519–526
isothermal transformation diagrams of a heavy-section high alloy 449–457
mechanical properties of 395–400
prediction of matrix microstructure in 465–469
production and evaluation of heavy-section cast 585–595
refractory cloth filtration of 401–411
solid state graphitization in normalized and annealed 597–608
statistical modeling for prediction of shrinkage in 489–494
structural characterization of rapidly quenched 717–723
Ductility of leaded red brass, effect of shot blasting on 141–144

E

EP-toxic waste, treatment of 459–463
Expendable pattern casting 565–572, 923–933
of aluminum alloy using vacuum techniques 131–140
effects of polymer degradation on quality of 923–933
full mold process beginnings of 943–946
PMMA molded foams for use in ferrous 667–670
predicted use in 1995 of 371–378
sand vibration in 631–640

F

Fatigue
properties in heavy section ADI 759–764
strength of ductile iron 511–518
Feeding
distance in steel 261–266
efficiency of A356 aluminum alloy 735–746
Filters, reticulated ceramic metal, for steel 671–675
Filtration of ductile iron by refractory cloth 401–411
Full mold process. See: *Expendable pattern casting*

G

Gassing of CO_2 silicate sand 57–61
Gating, tundish 295–300
Grain refinement of a cast Cu-Ni-Sn spinodal alloy 25–33
Graphite deterioration of austenite shells 783–786
Graphitization, solid state, in ductile cast irons 597–608
Gray iron
applying Delta T measurements to inoculation of 379–384
chill formation in 699–706
cracks in CG and 213–225
Green sand
cold box core dilution in 151–159
systems, clay activation and moisture in 495–503

H

Heat
formation in gray iron 699–706
pipe, used as an active chill in thermal steel casting 559–563
release model of casting solidification 539–546
transfer-solidification kinetics model of chill formation in gray iron 699–706
Hot spots in castings, computer-aided location of 353–357
Hydrogen, ductility damage of stainless steel casting resulting from 235–239

I

Inclusions
in cast steel 105–113
trapping by refractory cloth filtration 401–411
Induction ladle metallurgy for the steel foundry 573–578
Induction melting costs, estimating 331–335
Inoculation of gray iron, applying Delta T measurements to 379–384
Investment casting
of ductile iron, effects of shell temperature on 201–206
single crystal solidification modeling of 417–428
Isothermal transformation diagrams in ductile iron 519–526

K

Kish graphite, morphology of 385–394

L

Ladles
metallurgy for the induction melting of steel 573–578
sprayed refractory linings for 207–211
Liquid metal processing 553–557
Lost foam casting. See: *Expendable pattern casting*

M

Management, computer-assisted 689–698
Melting
computer controlled procedure for steel 101–104
costs, estimating cupola and induction 331–335
superheated non-equilibrium crystallization of AlFeSi compound during 889–895
Metal
matrix composite, squeeze-casting of aluminum alloy 115–122
reactions of molds and, during casting of titanium in zircon sand molds 253–260
processing for aluminum foundries 579–584
processing of liquid 553–557
pouring molten, with vision technology 641–644
Methylene Blue test, gage R&R determination of 747–752
Modeling. See also: *Solidification*
of microstructure evolution and microporosity formation in casting aluminum 897–904
silicon carbide reinforced aluminum alloy 341–344
statistical, for prediction of shrinkage in ductile irons 489–494
Mold-metal reactions
during casting of titanium in zircon sand molds 253–260
thermal conductance of, in permanent mold casting 193–200
Molding sand, use of a flowability enhancer in 71–83
Molds
modification of an Al-5% Si alloy in 879–883
sand and carbon fiber additions to plaster 301–304
thermal conductance at the mold-metal interface of permanent 193–200

N

Near net shape castings, cope-to-drag registration system for 787–793
Nodular graphite
effect on deterioration of 783–786
formation of austenite shell around 783–786

P

Patterns
computer-assisted parting line determination in 795–800
CAD/CAM development of 885–888
shrinkage in EPS 367–370
tooling, use of CMM in making 127–129
Permanent mold castings
of copper-base alloys 41–48
measurement of the thermal conductance at the mold/metal interface in 193–200
Plasma
arc used in a foundry cupola 677–682
refining for steel foundries 267–271
Plaster molds, effects of sand and carbon fiber additions on castings and 301–304
Plate castings, feeding and mechanical properties of A206 935–941
PMMA molding foams for use in ferrous EPC process 667–670
Polymer degradation, effects of, on the quality of lost foam castings 923–933
Porosity formation, modeling of 823–830

R

Recycling, profits from solid waste 953–955
Refractory linings, sprayed ladle and tundish 207–211
Registration system, cope-to-drag, for production of near net shape castings 787–793
Risers, exothermic mini 305–309

S

Sand
additions to plaster molds, effects of 301–304
Bentonite, performance of, with a flowability enhancer 71–83
carbon dioxide gassing technology of silicate 57–61
carbon dioxide used to harden silicate 281–286
cooling, reduction in scrap through 161–166
effect of squeeze pressure on density in high grade 947–955
green strength and compactibility in green 245–252
use of flowability enhancer in molding 71–83
vibration for lost foam process 631–640
Sand systems. See also: *Green sand*
cold box 49–56
Scrap, reduction in sand-related 161–166
SG cast irons. See: *Spheroidal graphite iron*
Shot blasting effect on the ductility of leaded red brass 141–144
Simulation modeling for steel castings 311–318
Sodium silicate binders, CO_2 gassed 57–61
Solidification. See also: *Modeling*
computer modeling of casting 527–537
of 356 aluminum alloy 735–746
heat release modeling of 539–546
modeling of single-crystal investment castings 417–428
numerical algorithm for modeling casting 527–537
simulation of steel casting 311–318
unidirectional, of cast iron 483–488
use of chills for 547–552
Spectrometer analysis of casting alloys 85–88
Spheroidal graphite iron. See also: *Ductile irons*
methods for producing sound castings using 273–279
Squeeze casting, improved properties of particulate MMCs used in 115–122
Stainless steel, effects of hydrogen in 235–239
Steel casting
chromite defect in 89–100
computer controlled melting procedure for 101–104
diagnosing defects in 477–482
feeding distance in 261–265
gating 295–300
grinding wheel for 337–339
heat pipe in 559–563
heavy section, chromite double skin inclusions in 89–100
intercritical normalizing treatment of 187–191
melting procedure for 101–104
reticulate ceramic metal filters for 671–675
stainless, effects of hydrogen on 235–239
variation of inclusions in, with mold types 105–113
Steel foundries
induction ladle metallurgy for 573–578
plasma refining for 267–271
Strontium
modification of aluminum investment castings alloys 505–509
treatment of antimony-containing A356 alloy 227–234

T

Thermal deformation of cast irons 287–293
Titanium casting, metal-mold reactions in 253–260
Tundish flows and gating of steel 295–300

V

Vacuum techniques for aluminum alloy castings 131–140
Vision technology, used in automatic pouring 641–644

W

Waste
profits through recycling 953–955
treatment of EP-toxic foundry 459–463
Wear resistance
of white cast irons 707–716
quantification of material 145–149
White cast iron
"aus-aging" and corrosive wear behavior of 707–716
effect of boron on structures of 775–781
grindability of, with coated abrasive belts 359–366

Title Index

A

Advanced Reticulated Ceramic Metal Filters and Performance Results from Select Steel Foundries (90-131) 671

Advances in Chemicals and Processes for the Impregnation of Castings (90-022) 859

Advantages of Sprayed Ladle and Tundish Sprayed Refractory Lining (90-012) 207

Aging Behavior in Cast Al-Si-Mg Alloys (90-179) 905

Application of Mixed Integer Programming to Schedule the Basic Operations for Making Castings in a Foundry, An—Part 1 (90-154) 645

Applying Delta T Measurements to Gray Iron Inoculation (90-100) 379

"Aus-Aging" and Corrosive Wear Behavior of Cr-Mn-Cu White Cast Irons (90-186) 707

Automatic Pouring of Molten Metal by Utilizing Real Time Vision Based Control System (90-129) 641

B

Benefits of Solidification Simulation for Steel Castings, The (90-080) 311

C

Chromite Double Skin Defect on Heavy-Section Steel Castings (90-028) 89

Clay Activation and Moisture in Green Sand Systems (90-032) 495

Clean Metal for Aluminum Foundries: New Technology Using a Rotor Degasser and Filter Pump (90-138) 579

Cold Box Core Dilution in Green Sand: An Analysis of Effects on Casting Quality (90-050) 151

Comparison on Different Modes of Latent Heat Release for Modeling Casting Solidification (90-133) 539

Computer-Assisted Production/Quality Management for the Smaller Foundry (90-087) 689

Computer Controlled Melting Procedure for Steel Castings (90-035) 101

Computer-Assisted Parting Line Development for Cast Pattern Production (90-137) 795

Correlation of Feeding and Mechanical Properties of A206 Aluminum Alloy Plate Casting (90-187) 935

Crack Initiation and Propagation in Gray and Compacted Graphite (CG) Cast Irons (90-091) 213

D

Determination of Gage R&R on Various Methylene Blue Test Procedures (90-007) 747

Development of a Computerized Diagnostic System for Casting Defects, The (90-185) 855

Development of Copper Alloy Composition for Gravity, Low-Pressure, and High-Pressure Die Casting (90-055) 327

Ductility Improvement in BeCu C82500 Casting Alloys (90-041) 319

E

Effect of Boron on Structures and Properties of 28% Cr White Cast Iron, The (90-018) 775

Effect of Cooling Rate and Casting Geometry on the Mechanical Property of A201 Aluminum Alloy Plate Castings, The (90-159) 801

Effect of Squeeze Pressure on Density in High Clay Sands (90-193) 947

Effects of Alloy Additions on the Microstructure and Mechanical Properties of Commercial Ductile Iron (90-122) 395

Effects of Polymer Degradation on the Quality of Lost Foam Castings (90-181) 923

Effects of Sand and Carbon Fiber Additions on Plaster Mold and Casting Properties (90-095) 301

Effects of Shot Blasting on the Ductility of Red Brass, The (90-183) 141

Effects of Solidification Parameters on the Feeding Efficiency of A356 Aluminum Alloy (90-117) 735

Efficient and Accurate Numerical Algorithm for Multi-Dimensional Modeling of Casting Solidification, Part I: Control Volume Method, An (90-132) 527

Estimating Cupola and Induction Melting Costs Using a Computer Model (90-054) 331

Evaluation of Acoustic Emission from Sand Cast Aluminum Alloy 319 During Solidification and Formation of Casting Defects (90-136) 1

Evaporative Pattern Casting Factors Affecting Expandable Polystyrene (EPS) Pattern Shrinkage (90-116) 367

F

Fatigue Strength of Commercial Ductile Irons (90-123) 511

Feed Metal Transfer in Al-Cu-Si Alloys (90-165) 845

Feeding Distance in Steel: A Second Look (90-038) 261

Formation Mechanism of Chunky Graphite in Heavy-Section Ductile Cast Irons (90-042) 429

Formation of Austenite Shell Around Nodular Graphite and Its Effect on Deterioration of Graphite (90-023) 783

From Conventional to CNC Pattern Build CAD/CAM Start Up (90-173) 885

Full Mold Process Beginnings (90-188) 943

G

Gating of Steel Castings—The Foundryman's Dilemma: Lessons from Tundish Flows (90-109) 295

Grain Refinement of a Cast Cu-Ni-Sn Spinodal Alloy (90-097) 25

Grid Method of Cast Iron Selection for Designed Applications (90-124) 175

Grindability of White Cast Iron with Coated Abrasive Belts (90-081) 359

H

Heat Pipe: An Active Chill in the Thermal Steel Casting Sand Mold System (90-020) 559

Heat Transfer–Solidification Kinetics Modeling of Structural Transitions: Chill Formation in Gray Iron (90-156) 699

Heavy-Section ADI: Fatigue Properties in As-Cast and Austempered Specimens (AFS Research) (90-166) 759

Heavy-Section ADI: Tensile Properties in As-Cast and Austempered Specimens (AFS Research) (90-167) 831

Hot Distortion of Cold Box Systems (90-070) 9

Hot Spots in Castings: Computer-Aided Location and Experimental Validation (90-064) 353

I

Increased Wear Performance of Abrasive Particles (90-037) 683

Induction Ladle Metallurgy for the Steel Foundry (90-130) 573

Influence of Austempering Temperature on the Characteristics of Austempered Ductile Iron Alloyed with Cu and Ni (90-160) 345

Influence of Solution Parameters and Simplified Supersaturation Treatments on Tensile Properties of A356 Alloy (90-180) 913

Interactive Effects During Sodium or Strontium Treatment of Antimony-Containing A356 Alloy (90-019) 227

Intercritical Normalize Treatment of a Low Carbon-Mn-RE Cast Steel (90-147) 187

Investigation into Secondary Metallurgical Process for Small Heats (90-105) 35

Investigation of Effects of Hydrogen on Ductility Damage of Heavy-Section Casting Made of Ni 4-6 (Ca6NM), An (90-034) 235

Isothermal Transformation Diagrams in a Heavy-Section, High-Alloy Ductile Cast Iron (AFS Research) (90-126) 449

K

Knowledge Representation for Diagnosing Defects in Steel Castings, A (90-101) 477

L

Liquid Metal Processing: Potential for the '90s (90-036) 553

Lost Foam Methoding: From Concept to Component (90-092) 565

M

Material Wear Resistance Quantification (90-048) 145

Measurement of the Thermal Conductance at the Mold/Metal Interface of Permanent Molds (90-010) 193

Metal-Mold Reactions During Casting of Titanium in Zircon Sand Molds (90-016) 253

Methods for Ensuring Sound SG Iron Castings (90-001) 273

Micro-Computer Control System of Cupola Process: Technical Experiment (90-006) 17

Micro-Inhomogeneity of Low-Alloy Austempered Ductile Cast Iron Matrix (90-013) 765

Microstructural Determination of Isothermal Transformation Diagrams in a Low-Alloy Ductile Iron, A (90-125) 519

Modeling of Microstructure Evolution and Microporosity Formation in Cast Aluminum Alloys (90-178) 897

Modeling of Porosity Formation in Castings (90-164) 823

Modeling Silicon Carbide Reinforced Aluminum Foundry Alloys (90-088) 341

Modeling the Effectiveness of Chills During Solidification (90-058) 547

Modification in the Mold of an Al-5% Si Alloy (90-017) 879

Mold/Metal Gap Formation of Aluminum Alloy 356 Cylinders Cast Horizontally in Dry and Green Sand (90-003) 63

Morphology of Kish Graphite (90-111) 385

N

New Cope-to-Drag Registration System for the Production of Near Net Shape Castings (for Tight Flask Molding) (90-065) 787

New Spectrometer for Accurate Analysis of Constituents in Casting Alloys, A (90-025) 85

Non-Equilibrium Crystallization of AlFeSi Compound in Melt-Superheated Al-Si Alloy Castings (90-176) 889

Nondestructive Testing of Aluminum Composite Castings (90-119) 123

O

Occurring Behavior of Porosity and Feeding Capabilities of Sodium- and Strontium-Modified Al-Si Alloys (90-079) 167

P

Plasma Refining for Steel Foundries (90-026) 267

PMMA Molded Foams for Use in the Ferrous EPC Process (90-145) 667

Practical Uses for Special Design Exothermic Mini-Risers (90-057) 305

Prediction of Matrix Microstructure in Ductile Iron (90-121) 465

Production and Evaluation of Heavy-Section Ductile Cast Iron (90-043) 585

Production of Aluminum Alloy Castings Using Evaporative Pattern and Vacuum Techniques (90-030) 131

Proper Reblending Techniques for Foundry Sand Systems and Their Effects on Cold Box Properties (90-029) 49

Prospects for Lost Foam in 1995, The (90-115) 371

R

Reduction in Sand-Related Scrap Through Effective Sand Cooling (90-033) 161

Refractory Cloth Filtration of Ductile Iron and the Mechanism of Inclusion Trapping (90-118) 401

Role of Antimony in Heavy-Section Ductile Iron, The (90-163) 753

Role of Squeeze-Casting Technique in Achieving Improved Property Performance Levels of Al-Al_2O_3-MgO Cast Particulate MMCs (90-096) 115

S

Sand Vibration for the Lost Foam Process (90-093) 631

Selecting the Best Grinding Wheel for Steel Castings (90-056) 337

Solid State Graphitization in Normalized and Annealed Ductile Cast Irons (90-143) 597

Solidification Modeling of Single-Crystal Investment Castings (90-053) 417

Some Experiments on Castability and Gating in the Permanent Mold Casting of Copper-Base Alloys (90-069) 41

Statistical Modeling for the Prediction of Shrinkage in Ductile Iron Castings (90-071) 489
Strontium Modification of Aluminum Investment Casting Alloys (90-090) 505
Structural Characterization of Rapidly Quenched Ductile Cast Irons (90-157) 717
Structure Property Relationships in Aluminum Alloy 339-T5: Tensile Behavior at Room and Elevated Temperature (90-148) 813
Studies on Precipitation Process of Secondary Carbides in High-Chromium Cast Iron (90-158) 725
Study of the Austempering of a Ni-Cu Alloyed Ductile Iron, A (90-142) 609
Study of the Effects of Shell Temperature on the Properties of Investment Cast Ductile Iron, A (AFS Research) (90-168) 201
Study of the Relationship of Notch Yield Ratio and Fracture Toughness of Structural Aircraft Quality D357 Aluminum Casting Alloy, A (AFS Research) (90-171) 865
Study of the Solid-Liquid Interface During Unidirectional Solidification of Cast Iron (90-112) 483
Study on Gassing Technology of CO_2 Silicate Sand, The (90-202) 57
Study on the Hardening Mechanism of Silicate-Carbon Dioxide Sand, The (90-201) 281
Supplier's Overview of Lost Foam Refractory Coatings, A (90-021) 241
Synergistic Reactions of Various Bentonite Clay Types and Their Foundry Molding Sand Performance in the Presence of a Flowability Enhancer (90-024) 71

T

Tensile Properties and Microstructure of a Clean Austempered Ductile Iron (90-127) 471
Thermal Deformation Characteristics of Low Thermal Expansion Cast Irons with Various Graphite Shapes (90-027) 287
Thin-Walled Castings by the CLV Process (90-082) 413
Treatment of EP-Toxic Foundry Waste: Regulatory and Technical Overview (90-067) 459

U

Understanding Green Strength and Compactibility in Green Sand Systems (90-031) 245
Use of a CMM Throughout the Making of Pattern Tooling (90-046) 127
Use of Plasma Torch in a Foundry Cupola (90-152) 677

V

Variation of Inclusions in Cast Steel with Mold Types and Its Effects on Properties (90-107) 105

W

Waste Minimization Contributes to Profits Through Solid Waste Recycling (90-110) 953

Division Index

ENGINEERING

Heat Pipe: An Active Chill in the Thermal Steel Casting Sand Mold System (90-20)—J. Kunes, L. Chaloupka, V. Trkovsky, J. Schneller, A. Zuzanak 559

Advances in Chemicals and Processes for the Impregnation of Castings (90-22)—N. H. Hewett 859

A New Spectrometer for Accurate Analysis of Constituents in Casting Alloys (90-25)—W. C. Batie, A. E. Bernhard, E. J. Edin 85

Modeling the Effectiveness of Chills During Solidification (90-58)—H. Huang, A. V. Lodhia, J. T. Berry 547

Hot Spots in Castings: Computer-Aided Location and Experimental Validation (90-64)—B. Ravi, M. N. Srinivasan 353

Computer-Assisted Production/Quality Management for the Smaller Foundry (90-87)—T. Law 689

Automatic Pouring of Molten Metal by Utilizing Real Time Vision Based Control System (90-129)—E. Tabatabaei 641

An Efficient and Accurate Numerical Algorithm for Multi-Dimensional Modeling of Casting Solidification, Part I: Control Volume Method (90-132)—J. H. Chen, H. L. Tsai 527

Comparison on Different Modes of Latent Heat Release for Modeling Casting Solidification (90-133)—J. H. Chen, H. L. Tsai 539

An Application of Mixed Integer Programming to Schedule the Basic Operations for Making Castings in a Foundry, Part 1 (90-154)—L. G. Yu, R. L. Lewis 645

Modeling of Porosity Formation in Castings (90-164)—I. J. Chiou, H. L. Tsai 823

ALUMINUM

Measurement of the Thermal Conductance at the Mold/Metal Interface of Permanent Molds (90-10)—F. Chiesa 193

Modification in the Mold of an Al-5% Si Alloy (90-17)—J. Hinojosa, C. Atlatenco, I. Beltran 879

Interactive Effects During Sodium or Strontium Treatment of Antimony-Containing A356 Alloy (90-19)—W. O. Wang, J. E. Gruzleski 227

Occurring Behavior of Porosity and Feeding Capabilities of Sodium- and Strontium-Modified Al-Si Alloys (90-79)—H. Iwahori, K. Yonekura, Y. Yamamoto, M. Nakamura 167

Modeling Silicon Carbide Reinforced Aluminum Foundry Alloys (90-88)—A. Saigal 341

Role of Squeeze-Casting Technique in Achieving Improved Property Performance Levels of Al-Al_2O_3-MgO Cast Particulate MMCs (90-96)—J. Singh, S. K. Goel, V. N. S. Mathur, M. L. Kapoor 115

Effects of Solidification Parameters on the Feeding Efficiency of A356 Aluminum Alloy (90-117)—E. N. Pan, C. S. Lin, C. R. Loper, Jr. 735

Nondestructive Testing of Aluminum Composite Castings (90-119)—D. E. Hammond 123

Evaluation of Acoustic Emission from Sand Cast Aluminum Alloy 319 During Solidification and Formation of Casting Defects (90-136)—A. L. Purvis, E. Kannatey-Asibu, Jr., R. Pehlke 1

Clean Metal for Aluminum Foundries: New Technology Using a Rotor Degasser and Filter Pump (90-138)—D. V. Neff, P. V. Cooper 579

Structure-Property Relationships in Aluminum Alloy 339-T5: Tensile Behavior at Room and Elevated Temperature (90-148)—P. N. Crepeau, S. D. Antolovich, J. A. Worden 813

The Effect of Cooling Rate and Casting Geometry on the Mechanical Property of A201 Aluminum Alloy Plate Castings (90-159)—Y-S. Kuo, E. Chang, R-R. Jeng, H-H. Ho 801

Feed Metal Transfer in Al-Cu-Si Alloys (90-165)—C. R. Loper, Jr., T. E. Prucha 845

A Study of the Relationship of Notch Yield Ratio and Fracture Toughness of Structural Aircraft Quality D357 Aluminum Casting Alloy (AFS Research) (90-171)—K. J. Oswalt, A. Maloit 865

Non-Equilibrium Crystallization of AlFeSi Compound in Melt-Superheated Al-Si Alloy Castings (90-176)—Y. Awano, Y. Shimizu 889

Modeling of Microstructure Evolution and Microporosity Formation in Cast Aluminum Alloys (90-178)—S. Shivkumar, D. Apelian, J. Zou 897

Aging Behavior in Cast Al-Si-Mg Alloys (90-179)—S. Shivkumar, C. Keller, D. Apelian 905

Influence of Solution Parameters and Simplified Supersaturation Treatments on Tensile Properties of A356 Alloy (90-180)—S. Shivkumar, S. Ricci, Jr., D. Apelian 913

Effects of Polymer Degradation on the Quality of Lost Foam Castings (90-181)—L. Wang, S. Shivkumar, D. Apelian 923

Correlation of Feeding and Mechanical Properties of A206 Aluminum Alloy Plate Casting (90-187)—Y. W. Lee, E. Chang, Y. L. Lin, C. H. Yeh 935

Silver Anniversary Paper, Div. 2

Full Mold Process Beginnings (90-188)—H. B. Dieter 943

BRASS & BRONZE

Development of a Copper Alloy Composition for Gravity, Low-Pressure, and High-Pressure Die Casting (90-55)—R. H. Haupt 327

Some Experiments on Castability and Gating in the Permanent Mold Casting of Copper-Base Alloys (90-69)—K. G. Davis, J. G. Magny 41

Grain Refinement of a Cast Cu-Ni-Sn Spinodal Alloy (90-97)—M. Sahoo, M. Wirth 25

The Effect of Shot Blasting on the Ductility of Leaded Red Brass (90-183)—E. P. Bloomfield 141

MOLDING METHODS & MATERIALS

Mold/Metal Gap Formation of Aluminum Alloy 356 Cylinders Cast Horizontally in Dry and Green Sand (90-03)—M. C. Lukens, T. X. Hou, R. D. Pehlke 63

Determination of Gage R&R on Various Methylene Blue Test Procedures (90-07)—V. S. LaFay, S. L. Neltner 747

Metal-Mold Reactions During Casting of Titanium in Zircon Sand Molds (90-16)—R. L. Saha, T. K. Nandy, R. D. K. Misra, K. T. Jacob 253

Synergistic Reactions of Various Bentonite Clay Types and Their Foundry Molding Sand Performance in the Presence of a Flowability Enhancer (90-24)—D. Hentz, E. Olson 71

Chromite Double Skin Defect on Heavy-Section Steel Castings (90-28)—J. D. Howden 89

Proper Reblending Techniques for Foundry Sand Systems and Their Effects on No-Bake Binder Properties (90-29)—J. A. Otte, Jr., W. D. Scott, D. F. Hoyt 49

Understanding Green Strength and Compactibility in Green Sand Systems (90-31)—R. W. Heine, R. A. Green, T. S. Shih 245

Clay Activation and Moisture in Green Sand Systems (90-32)—R. A. Green, R. W. Heine 495

Reduction in Sand-Related Scrap Through Effective Sand Cooling (90-33)—M. J. Aklinski, M. J. Granlund 161

Cold Box Core Dilution in Green Sand: An Analysis of Effects on Casting Quality (90-50)—L. J. Pedicini, M. B. Krysiak 151

Hot Distortion of Cold Box Systems (90-70)—G. C. Fountaine, K. B. Horton 9

Effects of Sand and Carbon Fiber Additions on Plaster Mold and Casting Properties (90-95)—J. Davis, J. R. Brevick 301

Silver Anniversary Paper, Div. 4
Effect of Squeeze Pressure on Density in High Clay Sands (90-193)—R. A. Green 947

Study on the Hardening Mechanism of Silicate-Carbon Dioxide Sand (90-201)—N. Y. Huang, X. P. Dong, W. O. Wang 281

The Study on Gassing Technology of CO_2 Silicate Sand (90-202)—N. Y. Huang, X. P. Dong, W. O. Wang 57

CAST IRON

Methods for Ensuring Sound SG Iron Castings (90-01)—A. Louvo, P. Kalavainen, J. R. Berry, D. M. Stefanescu 273

Micro-Inhomogeneity of of Low-Alloy Austempered Ductile Cast Iron Matrix (90-13)—E. Dorazil, T. Podrábsky, J. Svejcar 765

Effect of Boron on Structures and Properties of 28% Cr White Cast Iron (90-18)—N. Ma, Q. Rao, Q. Zhou 775

Formation of Austenite Shell Around Nodular Graphite and Its Effect on Deterioration of Graphite (90-23)—Z. Jiyang, W. Schmitz, S. Engler 783

Thermal Deformation Characteristics of Low Thermal Expansion Cast Irons with Various Graphite Shapes (90-27)—T. Noguchi, T. Muroga, K. Minoya, H. Nayuki 287

Increased Wear Performance of Abrasive Particles (90-37)—G. Calboreanu 683

Formation Mechanism of Chunky Graphite in Heavy-Section Ductile Cast Irons (90-42)—H. Itofuji, H. Uchikawa 429

Production and Evaluation of Heavy-Section Ductile Cast Iron (90-43)—H. Itofuji, K. Kawamura, N. Hashimoto, H. Yamada 585

Statistical Modeling for the Prediction of Shrinkage in Ductile Iron Castings (90-71)—C. A. Fung, P. F. Bartelt, F. J. Bradley, R. W. Heine 489

Grindability of White Cast Iron with Coated Abrasive Belts (90-81)—F. D. Brown, J. G. Gagliardi, G. R. Abrahamson, E. J. Duwell 359

Crack Initiation and Propagation in Gray and Compacted Graphite (CG) Cast Irons (90-91)—R. C. Voigt, S. D. Holmgren 213

Applying Delta T Measurements to Gray Iron Inoculation (90-100)—J. R. Brevick, J. Davis 379

Morphology of Kish Graphite (90-111)—S. Liu, C. R. Loper, Jr. 385

Study of the Solid-Liquid Interface During Unidirectional Solidification of Cast Iron (90-112)—Y. X. Li, B. C. Liu, C. R. Loper, Jr. 483

Refractory Cloth Filtration of Ductile Iron and the Mechanism of Inclusion Trapping (90-118)—J. R. Hitchings, S. Clark 401

Prediction of Matrix Microstructure in Ductile Iron (90-121)—D. Venugopalan 465

Effects of Alloy Additions on the Microstructure and Mechanical Properties of Commercial Ductile Iron (90-122)—D. Venugopalan, A. Alagarsamy 395

Fatigue Strength of Commercial Ductile Irons (90-123)—J. F. Janowak, A. Alagarsamy, D. Venugopalan 511

Grid Method of Cast Iron Selection for Designed Applications (90-124)—J. F. Janowak 175

A Microstructural Determination of Isothermal Transformation Diagrams in a Low-Alloy Ductile Iron (90-125)—D. J. Moore, B. S. Shugart, K. L. Hayrynen, K. B. Rundman 519

Isothermal Transformation Diagrams in a Heavy-Section, High-Alloy Ductile Cast Iron (AFS Research) (90-126)—D. J. Moore, G. P. Faubert, E. D. McCarty, D. J. Ellerbrock, K. B. Rundman 449

Tensile Properties and Microstructure of a Clean Austempered Ductile Iron (90-127)—K. L. Hayrynen, D. J. Moore, K. B. Rundman 471

A Study of the Austempering of a Ni-Cu Alloyed Ductile Iron (90-142)—T. S. Shih, P. Y. Lin, C. H. Chang, C. R. Loper, Jr. 609

Solid State Graphitization in Normalized and Annealed Ductile Cast Irons (90-143)—A. Javaid, C. R. Loper, Jr. 597

Heat Transfer–Solidification Kinetics Modeling of Structural Transitions: Chill Formation in Gray Iron (90-156)—G. Upadhya, D. K. Banerjee, D. M. Stefanescu, J. L. Hill 699

Structural Characterization of Rapidly Quenched Ductile Cast Irons (90-157)—K. Yang, M. H. Hon, K. C. Su 717

Studies on Precipitation Process of Secondary Carbides in High-Chromium Cast Iron (90-158)—M. Kuwano, K. Ogi, A. Sawamoto, K. Matsuda 725

Influence of Austempering Temperature on the Characteristics of Austempered Ductile Iron Alloyed with Cu and Ni (90-160)—M. Grech, J. M. Young 345

The Role of Antimony in Heavy-Section Ductile Iron (90-163)—B. C. Liu, T. X. Li, Z. J. Rui, X. Y. Yang, E. Q. Huo, C. R. Loper, Jr. 753

Heavy-Section ADI: Fatigue Properties in As-Cast and Austempered Specimens (AFS Research) (90-166)—G. P. Faubert, D. J. Moore, K. B. Rundman 759

Heavy-Section ADI: Tensile Properties in As-Cast and Austempered Specimens (AFS Research) (90-167)—G. P. Faubert, D. J. Moore, K. B. Rundman 831

The Development of a Computerized Diagnostic System for Casting Defects (90-185)—P-H. Yang, W-S. Hwang 855

"Aus-Aging" and Corrosive Wear Behavior of Cr-Mn-Cu White Cast Irons (90-186)—A. Basak, I. Chakrabarty 707

INVESTMENT CASTING

Ductility Improvement in BeCu C82500 Casting Alloys (90-41)—A. Torok, T. Walsh, Sr., C. Hershberger, Y. V. Murty 319

Solidification Modeling of Single-Crystal Investment Castings (90-53)—K. O. Yu, M. J. Beffel, M. Robinson, D. D. Goettsch, B. G. Thomas, D. Pinella, R. G. Carlson 417

Thin-Walled Castings by the CLV Process (90-82)—G. D. Chandley, D. L. Cargill 413

Strontium Modification of Aluminum Investment Casting Alloys (90-90)—B. Closset, D. Fay 505

A Study of the Effects of Shell Temperature on the Properties of Investment Cast Ductile Iron (90-168)—C. V. White, D. L. Twarog 201

PATTERN

Use of a CMM Throughout the Making of Pattern Tooling (90-46)—J. L. Binzak 127

Material Wear Resistance Quantification (90-48)—J. Hoge, R. Eadara 145

New Cope-to-Drag Registration System for the Production of Near Net Shape Castings (for Tight Flask Molding) (90-65)—J. M. Burnett 787

Computer-Assisted Parting Line Development for Cast Pattern Production (90-137)—M. A. Ganter, L. L. Tuss 795

From Conventional to CNC Pattern Build CAD/CAM Start Up (90-173)—G. R. Witcombe 885

MELTING METHODS & MATERIALS

Micro-Computer Control System of Cupola Process: Technical Experiment (90-06)—G. Zhu, Z. Zhao, Y. Wang, B. Yu 17

Advantages of Sprayed Ladle and Tundish Sprayed Refractory Lining (90-12)—A. W. Powdrell 207

Hoyt Memorial Lecture
Liquid Metal Processing: Potential for the '90s (90-36)—S. Katz 553

Estimating Cupola and Induction Melting Costs Using a Computer Model (90-54)—J. R. Rotella, G. A. Walzer 331

Investigation into Secondary Metallurgical Process for Small Heats (90-105)—F. Wagener, N. G. Bliss 35

Use of Plasma Torch in a Foundry Cupola (90-152)—G. Crouzillat, B. Million-Rousseau 677

STEEL

Plasma Refining for Steel Foundries (90-26)—J. M. Svoboda 267

An Investigation of Effects of Hydrogen on Ductility Damage of Heavy-Section Casting Made of Ni 4-6 (Ca6NM) (90-34)—Z. Zhongqiu 235

Computer Controlled Melting Procedure for Steel Castings (90-35)—H. Ableidinger 101

Feeding Distance in Steel: A Second Look (90-38)—N. Wukovich 261

Selecting the Best Grinding Wheel for Steel Castings (90-56)—A. R. Hubbard, J. C. Buehler 337

Practical Uses for Special Design Exothermic Mini-Risers (90-57)—C. C. Noll, J. D. Kautz 305

Benefits of Solidification Simulation for Steel Castings (90-80)—C. F. Corbett, M. Picard 311

A Knowledge Representation for Diagnosing Defects in Steel Castings (90-101)—H. Md. Roshan, P. Jain 477

Variation of Inclusions in Cast Steel With Mold Types and Its Effects on Properties (90-107)—T. S. Shih, J. Y. Wang 105

Gating of Steel Castings—The Foundryman's Dilemma: Lessons From Tundish Flows (90-109)—T. S. Piwonka, N. H. El-Kaddah 295

Induction Ladle Metallurgy for the Steel Foundry (90-130)—N. P. Cignetti, R. U. Swaney 573

Advanced Reticulated Ceramic Metal Filters and Performance Results from Select Steel Foundries (90-131)—J. Morris, S. Sahu, U. S. Sievers 671

Intercritical Normalize Treatment of a Low Carbon-Mn-Re Cast Steel (90-147)—H. Ding, H. X. Chen 187

ENVIRONMENTAL CONTROL

Treatment of EP-Toxic Foundry Waste: Regulatory and Technical Overview (90-67)—P. D. Turpin, R. R. Stanforth, T. P. Kunes 459

Waste Minimization Contributes to Profits Through Solid Waste Recycling (90-110)—C. M. Davis, W. A. Baker 953

EVAPORATIVE PATTERN CASTING

A Supplier's Overview of Lost Foam Refractory Coatings (90-21)—O. A. Martinez 241

Production of Aluminum Alloy Castings Using Evaporative Pattern and Vacuum Techniques (90-30)—J. L. Dion, R. D. Warda, R. K. Buhr, J. R. Emmett, M. Sahoo 131

Lost Foam Methoding: From Concept to Component (90-92)—N. K. Graham, T. R. Webster 565

Sand Vibration for the Lost Foam Process (90-93)—E. L. Wegscheid 631

The Prospects for Lost Foam in 1995 (90-115)—J. A. Troxler, Jr. 371

Evaporative Pattern Casting: Factors Affecting Expandable Polystyrene (EPS) Pattern Shrinkage (90-116)—E. H. Niemann, G. B. Kelly 367

PMMA Molded Foams for Use in the Ferrous EPC Process (90-145)—J. Brenner, P. Frederick, N. Moll 667

1990 TRANSACTIONS

Board of Directors 1989–1990 ix

Official Program, 94th Casting Congress xi

Division Awards xix

Chapter Officers Conference Program xx

Reports xxi

Minutes xli

Evaluation of Acoustic Emission from Sand Cast Aluminum Alloy 319 During Solidification and Formation of Casting Defects (90-136)—A. L. Purvis, E. Kannatey-Asibu, Jr., R. Pehlke 1

Hot Distortion of Cold Box Systems (90-70)—G. C. Fountaine, K. B. Horton 9

Micro-Computer Control System of Cupola Process: Technical Experiment (90-06)—G. Zhu, Z. Zhao, Y. Wang, B. Yu 17

Grain Refinement of a Cast Cu-Ni-Sn Spinodal Alloy* (90-97)—M. Sahoo, M. Wirth 25

Investigation into Secondary Metallurgical Process for Small Heats (90-105)—F. Wagener, N. G. Bliss 35

Some Experiments on Castability and Gating in the Permanent Mold Casting of Copper-Base Alloys* (90-69)—K. G. Davis, J. G. Magny 41

Proper Reblending Techniques for Foundry Sand Systems and Their Effects on No-Bake Binder Properties (90-29)—J. A. Otte, Jr., W. D. Scott, D. F. Hoyt 49

The Study on Gassing Technology of CO_2 Silicate Sand (90-202)—N. Y. Huang, X. P. Dong, W. O. Wang 57

Mold/Metal Gap Formation of Aluminum Alloy 356 Cylinders Cast Horizontally in Dry and Green Sand* (90-03)—M. C. Lukens, T. X. Hou, R. D. Pehlke 63

Synergistic Reactions of Various Bentonite Clay Types and Their Foundry Molding Sand Performance in the Presence of a Flowability Enhancer (90-24)—D. Hentz, E. Olson 71

A New Spectrometer for Accurate Analysis of Constituents in Casting Alloys (90-25)—W. C. Batie, A. E. Bernhard, E. J. Edin 85

Chromite Double Skin Defect on Heavy-Section Steel Castings* (90-28)—J. D. Howden 89

Computer Controlled Melting Procedure for Steel Castings (90-35)—H. Ableidinger 101

Variation of Inclusions in Cast Steel With Mold Types and Its Effects on Properties (90-107)—T. S. Shih, J. Y. Wang 105

Role of Squeeze-Casting Technique in Achieving Improved Property Performance Levels of Al-Al_2O_3-MgO Cast Particulate MMCs (90-96)—J. Singh, S. K. Goel, V. N. S. Mathur, M. L. Kapoor 115

Nondestructive Testing of Aluminum Composite Castings* (90-119)—D. E. Hammond 123

Use of a CMM Throughout the Making of Pattern Tooling (90-46)—J. L. Binzak 127

Production of Aluminum Alloy Castings Using Evaporative Pattern and Vacuum Techniques (90-30)—J. L. Dion, R. D. Warda, R. K. Buhr, J. R. Emmett, M. Sahoo 131

The Effect of Shot Blasting on the Ductility of Leaded Red Brass (90-183)—E. P. Bloomfield 141

Material Wear Resistance Quantification (90-48)—J. Hoge, R. Eadara 145

Cold Box Core Dilution in Green Sand: An Analysis of Effects on Casting Quality* (90-50)—L. J. Pedicini, M. B. Krysiak 151

Reduction in Sand-Related Scrap Through Effective Sand Cooling (90-33)—M. J. Aklinski, M. J. Granlund 161

Occurring Behavior of Porosity and Feeding Capabilities of Sodium- and Strontium-Modified Al-Si Alloys (90-79)—H. Iwahori, K. Yonekura, Y. Yamamoto, M. Nakamura 167

Grid Method of Cast Iron Selection for Designed Applications (90-124)—J. F. Janowak 175

Intercritical Normalize Treatment of a Low Carbon-Mn-RE Cast Steel (90-147)—H. Ding, H. X. Chen 187

Measurement of the Thermal Conductance at the Mold/Metal Interface of Permanent Molds* (90-10)—F. Chiesa 193

A Study of the Effects of Shell Temperature on the Properties of Investment Cast Ductile Iron* (AFS Research)(90-168)—C. V. White, D. L. Twarog 201

Advantages of Sprayed Ladle and Tundish Sprayed Refractory Lining (90-12)—A. W. Powdrell 207

Crack Initiation and Propagation In Gray and Compacted Graphite (CG) Cast Irons (90-91)—R. C. Voigt, S. D. Holmgren 213

Interactive Effects During Sodium or Strontium Treatment of Antimony-Containing A356 Alloy* (90-19)—W. O. Wang, J. E. Gruzleski 227

An Investigation of Effects of Hydrogen on Ductility Damage of Heavy-Section Casting Made of Ni 4-6 (Ca6NM) (90-34)—Z. Zhongqiu 235

A Supplier's Overview of Lost Foam Refractory Coatings (90-21)—O. A. Martinez 241

Understanding Green Strength and Compactibility in Green Sand Systems (90-31)—R. W. Heine, R. A. Green, T. S. Shih 245

Metal-Mold Reactions During Casting of Titanium in Zircon Sand Molds (90-16)—R. L. Saha, T. K. Nandy, R. D. K. Misra, K. T. Jacob 253

Feeding Distance in Steel: A Second Look (90-38)—N. Wukovich 261

Plasma Refining for Steel Foundries (90-26)—J. M. Svoboda 267

Methods for Ensuring Sound SG Iron Castings* (90-01)—A. Louvo, P. Kalavainen, J. R. Berry, D. M. Stefanescu 273

Study on the Hardening Mechanism of Silicate-Carbon Dioxide Sand (90-201)—N. Y. Huang, X. P. Dong, W. O. Wang 281

Thermal Deformation Characteristics of Low Thermal Expansion Cast Irons with Various Graphite Shapes (90-27)—T. Noguchi, T. Muroga, K. Minoya, H. Nayuki 287

Gating of Steel Castings—The Foundryman's Dilemma: Lessons From Tundish Flows* (90-109)—T. S. Piwonka, N. H. El-Kaddah 295

Effects of Sand and Carbon Fiber Additions on Plaster Mold and Casting Properties* (90-95)—J. Davis, J. R. Brevick 301

Practical Uses for Special Design Exothermic Mini-Risers* (90-57)—C. C. Noll, J. D. Kautz 305

Benefits of Solidification Simulation for Steel Castings (90-80)—C. F. Corbett, M. Picard 311

Ductility Improvement in BeCu C82500 Casting Alloys (90-41)—A. Torok, T. Walsh, Sr., C. Hershberger, Y. V. Murty 319

Development of a Copper Alloy Composition for Gravity, Low-Pressure, and High-Pressure Die Casting (90-55)—R. H. Haupt 327

Estimating Cupola and Induction Melting Costs Using a Computer Model* (90-54)—J. R. Rotella, G. A. Walzer 331

Selecting the Best Grinding Wheel for Steel Castings (90-56)—A. R. Hubbard, J. C. Buehler 337

Modeling Silicon Carbide Reinforced Aluminum Foundry Alloys (90-88)—A. Saigal 341

Influence of Austempering Temperature on the Characteristics of Austempered Ductile Iron Alloyed with Cu and Ni* (90-160)—M. Grech, J. M. Young 345

Hot Spots in Castings: Computer-Aided Location and Experimental Validation (90-64)—B. Ravi, M. N. Srinivasan 353

Grindability of White Cast Iron with Coated Abrasive Belts (90-81)—F. D. Brown, J. G. Gagliardi, G. R. Abrahamson, E. J. Duwell 359

Evaporative Pattern Casting: Factors Affecting Expandable Polystyrene (EPS) Pattern Shrinkage (90-116)—E. H. Niemann, G. B. Kelly 367

The Prospects for Lost Foam in 1995 (90-115)—J. A. Troxler, Jr. 371

Applying Delta T Measurements to Gray Iron Inoculation* (90-100)—J. R. Brevick, J. Davis 379

Morphology of Kish Graphite (90-111)—S. Liu, C. R. Loper, Jr. 385

Effects of Alloy Additions on the Microstructure and Mechanical Properties of Commercial Ductile Iron (90-122)—D. Venugopalan, A. Alagarsamy 395

Refractory Cloth Filtration of Ductile Iron and the Mechanism of Inclusion Trapping* (90-118)—J. R. Hitchings, S. Clark 401

Thin-Walled Castings by the CLV Process (90-82)—G. D. Chandley, D. L. Cargill 413

Solidification Modeling of Single-Crystal Investment Castings (90-53)—K. O. Yu, M. J. Beffel, M. Robinson, D. D. Goettsch, B. G. Thomas, D. Pinella, R. G. Carlson 417

Formation Mechanism of Chunky Graphite in Heavy-Section Ductile Cast Irons (90-42)—H. Itofuji, H. Uchikawa 429

Isothermal Transformation Diagrams in a Heavy-Section, High-Alloy Ductile Cast Iron (AFS Research) (90-126)—D. J. Moore, G. P. Faubert, E. D. McCarty, D. J. Ellerbrock, K. B. Rundman 449

Treatment of EP-Toxic Foundry Waste: Regulatory and Technical Overview (90-67)—P. D. Turpin, R. R. Stanforth, T. P. Kunes 459

Prediction of Matrix Microstructure in Ductile Iron (90-121)—D. Venugopalan 465

Tensile Properties and Microstructure of a Clean Austempered Ductile Iron (90-127)—K. L. Hayrynen, D. J. Moore, K. B. Rundman 471

A Knowledge Representation for Diagnosing Defects in Steel Castings (90-101)—H. Md. Roshan, P. Jain 477

Study of the Solid-Liquid Interface During Unidirectional Solidification of Cast Iron* (90-112)—Y. X. Li, B. C. Liu, C. R. Loper, Jr. 483

Statistical Modeling for the Prediction of Shrinkage in Ductile Iron Castings* (90-71)—C. A. Fung, P. F. Bartelt, F. J. Bradley, R. W. Heine 489

Clay Activation and Moisture in Green Sand Systems (90-32)—R. A. Green, R. W. Heine 495

Strontium Modification of Aluminum Investment Casting Alloys (90-90)—B. Closset, D. Fay 505

Fatigue Strength of Commercial Ductile Irons (90-123)—J. F. Janowak, A. Alagarsamy, D. Venugopalan 511

A Microstructural Determination of Isothermal Transformation Diagrams in a Low-Alloy Ductile Iron* (90-125)—D. J. Moore, B. S. Shugart, K. L. Hayrynen, K. B. Rundman 519

An Efficient and Accurate Numerical Algorithm for Multi-Dimensional Modeling of Casting Solidification, Part I: Control Volume Method* (90-132)—J. H. Chen, H. L. Tsai 527

Comparison on Different Modes of Latent Heat Release for Modeling Casting Solidification* (90-133)—J. H. Chen, H. L. Tsai 539

Modeling the Effectiveness of Chills During Solidification* (90-58)—H. Huang, A. V. Lodhia, J. T. Berry 547

Hoyt Memorial Lecture

Liquid Metal Processing: Potential for the '90s (90-36)—S. Katz 553

Heat Pipe: An Active Chill in the Thermal Steel Casting Sand Mold System (90-20)—J. Kunes, L. Chaloupka, V. Trkovsky, J. Schneller, A. Zuzanak 559

Lost Foam Methoding: From Concept to Component (90-92)—N. K. Graham, T. R. Webster 565

Induction Ladle Metallurgy for the Steel Foundry* (90-130)—N. P. Cignetti, R. U. Swaney 573

Clean Metal for Aluminum Foundries: New Technology Using a Rotor Degasser and Filter Pump* (90-138)—D. V. Neff, P. V. Cooper 579

Production and Evaluation of Heavy-Section Ductile Cast Iron (90-43)—H. Itofuji, K. Kawamura, N. Hashimoto, H. Yamada 585

Solid State Graphitization in Normalized and Annealed Ductile Cast Irons (90-143)—A. Javaid, C. R. Loper, Jr. 597

A Study of the Austempering of a Ni-Cu Alloyed Ductile Iron* (90-142)—T. S. Shih, P. Y. Lin, C. H. Chang, C. R. Loper, Jr. 609

Sand Vibration for the Lost Foam Process* (90-93)—E. L. Wegscheid 631

Automatic Pouring of Molten Metal by Utilizing Real Time Vision Based Control System (90-129)—E. Tabatabaei 641

An Application of Mixed Integer Programming to Schedule the Basic Operations for Making Castings in a Foundry, Part I (90-154)—L. G. Yu, R. L. Lewis 645

PMMA Molded Foams for Use in the Ferrous EPC Process (90-145)—J. Brenner, P. Frederick, N. Moll 667

Advanced Reticulated Ceramic Metal Filters and Performance Results from Select Steel Foundries (90-131)—J. Morris, S. Sahu, U. S. Sievers 671

Use of Plasma Torch in a Foundry Cupola (90-152)—G. Crouzillat, B. Million-Rousseau 677

Increased Wear Performance of Abrasive Particles (90-37)—G. Calboreanu 683

Computer-Assisted Production/Quality Management for the Smaller Foundry (90-87)—T. Law 689

Heat Transfer–Solidification Kinetics Modeling of Structural Transitions: Chill Formation in Gray Iron (90-156)—G. Upadhya, D. K. Banerjee, D. M. Stefanescu, J. L. Hill 699

"Aus-Aging" and Corrosive Wear Behavior of Cr-Mn-Cu White Cast Irons (90-186)—A. Basak, I. Chakrabarty 707

Structural Characterization of Rapidly Quenched Ductile Cast Irons (90-157)—K. Yang, M. H. Hon, K. C. Su 717

Studies on Precipitation Process of Secondary Carbides in High-Chromium Cast Iron (90-158)—M. Kuwano, K. Ogi, A. Sawamoto, K. Matsuda 725

Effects of Solidification Parameters on the Feeding Efficiency of A356 Aluminum Alloy* (90-117)—E. N. Pan, C. S. Lin, C. R. Loper, Jr. 735

Determination of Gage R&R on Various Methylene Blue Test Procedures (90-07)—V. S. LaFay, S. L. Neltner 747

The Role of Antimony in Heavy-Section Ductile Iron* (90-163)—B. C. Liu, T. X. Li, Z. J. Rui, X. Y. Yang, E. Q. Huo, C. R. Loper, Jr. 753

Heavy-Section ADI: Fatigue Properties in As-Cast and Austempered Specimens (AFS Research) (90-166)—G. P. Faubert, D. J. Moore, K. B. Rundman 759

Micro-Inhomogeneity of of Low-Alloy Austempered Ductile Cast Iron Matrix (90-13)—E. Dorazil, T. Podrábsky, J. Svejcar 765

Effect of Boron on Structures and Properties of 28% Cr White Cast Iron (90-18)—N. Ma, Q. Rao, Q. Zhou 775

Formation of Austenite Shell Around Nodular Graphite and Its Effect on Deterioration of Graphite (90-23)—Z. Jiyang, W. Schmitz, S. Engler 783

New Cope-to-Drag Registration System for the Production of Near Net Shape Castings (for Tight Flask Molding) (90-65)—J. M. Burnett 787

Computer-Assisted Parting Line Development for Cast Pattern Production (90-137)—M. A. Ganter, L. L. Tuss 795

The Effect of Cooling Rate and Casting Geometry on the Mechanical Property of A201 Aluminum Alloy Plate Castings (90-159)—Y-S. Kuo, E. Chang, R-R. Jeng, H-H. Ho 801

Structure-Property Relationships in Aluminum Alloy 339-T5: Tensile Behavior at Room and Elevated Temperature (90-148)—P. N. Crepeau, S. D. Antolovich, J. A. Worden 813

Modeling of Porosity Formation in Castings* (90-164)—I. J. Chiou, H. L. Tsai 823

Heavy-Section ADI: Tensile Properties in As-Cast and Austempered Specimens (AFS Research) (90-167)—G. P. Faubert, D. J. Moore, K. B. Rundman 831

Feed Metal Transfer in Al-Cu-Si Alloys (90-165)—C. R. Loper, Jr., T. E. Prucha 845

The Development of a Computerized Diagnostic System for Casting Defects (90-185)—P-H. Yang, W-S. Hwang 855

Advances in Chemicals and Processes for the Impregnation of Castings (90-22)—N. H. Hewett 859

A Study of the Relationship of Notch Yield Ratio and Fracture Toughness of Structural Aircraft Quality D357 Aluminum Casting Alloy (AFS Research) (90-171)—K. J. Oswalt, A. Maloit 865

Modification in the Mold of an Al-5% Si Alloy (90-17)—J. Hinojosa, C. Atlatenco, I. Beltran 879

From Conventional to CNC Pattern Build-CAD/CAM Start Up (90-173)—G. R. Witcombe 885

Non-Equilibrium Crystallization of AlFeSi Compound in Melt-Superheated Al-Si Alloy Castings (90-176)—Y. Awano, Y. Shimizu 889

Modeling of Microstructure Evolution and Microporosity Formation in Cast Aluminum Alloys (90-178)—S. Shivkumar, D. Apelian, J. Zou 897

Aging Behavior in Cast Al-Si-Mg Alloys (90-179)—S. Shivkumar, C. Keller, D. Apelian 905

Influence of Solution Parameters and Simplified Supersaturation Treatments on Tensile Properties of A356 Alloy (90-180)—S. Shivkumar, S. Ricci, Jr., D. Apelian 913

Effects of Polymer Degradation on the Quality of Lost Foam Castings (90-181)—L. Wang, S. Shivkumar, D. Apelian 923

Correlation of Feeding and Mechanical Properties of A206 Aluminum Alloy Plate Casting (90-187)—Y. W. Lee, E. Chang, Y. L. Lin, C. H. Yeh 935

Silver Anniversary Paper, Div. 2
Full Mold Process Beginnings (90-188)—H. B. Dieter 943

Silver Anniversary Paper, Div. 4
Effect of Squeeze Pressure on Density in High Clay Sands (90-193)—R. A. Green 947

Waste Minimization Contributes to Profits Through Solid Waste Recycling (90-110)—C. M. Davis, W. A. Baker 953
